

The FIDIS FI25 Crypto Index is our solution for minimizing your risk and maximizing your profits. No longer will you need to be concerned with selecting the next highest returning cryptocurrencies as our simple to own Ethereum-based token automatically allocates the most capitalized and highest trending cryptocurrencies into your investment basket. It reduces your trading costs by allowing you to purchase one crypto asset instead of twenty-five, and it facilitates easier asset management by eliminating the necessity for several different cryptocurrency wallets.

FI25 is backed by the top 25 cryptocurrencies (excluding stable coins). All underlying assets are held and secured with top crypto custodians on the market and provide the real value behind the FI25 token. It's simply a better alternative to the Crypto ETFs.

Our FI25 Crypto Index token is the first in a series of crypto index tokens which FIDIS will be integrating into our mobile crypto application. The FIDIS App will allow users to buy, sell, save, send, and get a loan using FI25 and other upcoming tokens. Those who participate in FI25 IEO will enjoy FREE instant transfers for life, as well as DOUBLE APY ¹ with the first saving contract! FIDIS will be releasing our mobile crypto application in Q1, 2022.

FIDIS provides you with opportunities to earn passive income with your FI25 Crypto Index tokens. Stake your FI25 Crypto Index tokens in yield farming within exchanges where it is listed to take advantage of high returns. Additionally, you can earn passive income by staking FI25 Crypto Index tokens in DeFi liquidity pools. Every time you provide liquidity for a trade, you earn a commission. Now, you can generate passive income, participate in the DeFi economy, and be your own market maker all while increasing your diversification and reducing your risk!

Our commitment to maximizing your profits is further enhanced by offering this product on the Optimistic Ethereum Layer 2 network. Not only will you enjoy faster token transfer times, enhanced network bandwidth, lower latency, and greatly reduced gas fees, but you will also have the same Ethereum Layer 1 security that you know you can depend on. Enhancing our technology stack to incorporate Ethereum Layer 2 protocol solutions provides you with the best possible environment to capitalize your investment strategy.

At FIDIS, we believe in empowering our customers and easing the burden of traditional financial decision making. The FI25 Crypto Index token allows you the freedom to spend your time on the more important things in life without worrying about your crypto investments while providing you with additional income generation opportunities. The FI25 Crypto Index token allows us to better fulfill our promise to you and lets you master the cryptocurrency markets like a pro!

Step up your cryptocurrency investment strategy with FIDIS's FI25 Crypto Index token!
